Save the date of **February 11th, 2012** for Special Olympics BC Healthy Athlete Screening Day!

Professionals from the fields of podiatry, dentistry, and optometry have received special training from Special Olympics and have volunteered on February 11th, 2012 to offer **FREE Health Screenings to Special Olympics BC athletes.**

These trained professionals use their training and tools specifically designed to help our athletes to catch some health issues that would otherwise go unnoticed.

The four disciplines offer a variety of Health services: Fit Feet, Health Promotions (delivered by UBC medical students), Special Smiles and the Lions Club International Opening Eyes, which provides a selection of FREE eyeglass frames and lenses to athletes in need.

Other fun games and activities will take place as well! This will all take place in Vancouver, but exact location is not yet finalized. Some transportation options will be available.

Athletes bring your friends, teammates, caregivers and parents, all are welcome! Coaches make it a team event and arrive on transit or carpool together!

Make sure your athlete takes advantage of this excellent opportunity!
